Moukite Necklace

Turquoise Necklace

Favorite Affordable Gemstones

Often when people hear the words “semiprecious gemstones,” dollar signs pop up in their head. Though the word “semi” is in there, it’s the “precious” part that’s scary. But if you’ve ever shopped for semiprecious

gemstones—pretty much every stone except diamonds, rubies, sapphires, and emeralds—you know that they can actually be quite reasonable. Try one of these awesome but affordable stones in your next jewelry design:

- Pyrite—called “fool’s gold” because it looks like gold
- Labradorite—a soft gray stone with stunning blue-green iridescence
- Kyanite—available in various blue and green colors
- Turquoise—loved because it can look casual or sophisticated
- Moukrite—a type of multicolored jasper
