## 1513-1 Found Objects Beads & Pendants

In this season of Beads, Baubles & Jewels, we've talked about a variety of natural materials as beads. But today, we're going to focus on other found objects and ideas for transforming them into distinctive jewelry designs. Get ready to look at your junk drawer in a whole new way!

Paper beads are an excellent way to turn trash into treasure. These colorful examples were handmade in Uganda from recycled paper, [www.kanzicraft.com](http://www.kanzicraft.com).

Whether you purchase paper beads or make your own, you can personalize your jewelry by adding found objects as dangles and charms. Use sturdy jump rings to fasten the elements right onto your necklace.

Katie attached Industrial Chic™ charms by Susan Lenart Kazmer to this long necklace. See an interview with Susan on *Beads, Baubles & Jewels* #1310.
