

## QUICK CHANGE TRAYS

(SINCE THIS ISN'T REALLY A "PROJECT" THE INSTRUCTIONS MAY BE A BIT STRANGE PART OF THE SPEED METHOD OF STRINGING)

1. Decide which beads need to be put onto stringing material, and in what order the color combinations need to be set up.
2. Pour the beads into the Quick Change Trays and arrange in the order in which they need to be strung onto the stringing material.
3. Thread the stringing material into the Curved Big Eye Needle (comes with the Spin-n-Bead and Spin-n-Bead Jr. Bead Loader).
4. Place the first Quick Change Tray onto the Spin-n-Bead (trays fit on both sizes), spin the tool and gently insert the curved needle into the spinning tray without touching the needle to the bottom or side of the spinning tray and watch the beads automatically load onto the needle.
5. Measure the amount of beads in the first color, if excess beads have loaded on, simply put them back into the tray. Drop on the next Tray containing the color of the bead that goes next on your pattern.
6. Continue to exchange the colors to get the desired length of each color of bead.

### List of items used

206A-420 SPIN-N-BEAD QUICK CHANGE TRAYS  
206A-410 SPIN-N- BEAD JR  
OR  
206A-400 SPIN-N-BEAD  
WILDFIRE STRINGING MATERIAL  
RED, BLUE, GREY, GREEN, OR WHITE  
CURVE BIG EYE NEEDLE  
SEED BEADS (CAN VARY SIZES, COLORS AND SHAPES)
