

## spaced out pearls bracelet

designer: Leslie Rogalski,  
editor in chief

### SUPPLIES

- 16" strand of 6mm daisy spacers: brass, silver or copper
- 15–25 size 6mm white glass pearls
- Bracelet memory wire in desired size (check packaging)
- Memory wire cutters
- Chain-nose pliers

### INSTRUCTIONS

- 1** Cut memory wire to wrap 3–4 times (or more) around your wrist as desired.
- 2** Using your chain-nose pliers, twist one end of the wire into as small a hairpin loop as possible and reposition your pliers to fold the end against the wire.
- 3** Starting with 1 pearl, alternate groups of spacers with single pearls on the length of the wire. Use groups of 12 spacers between pearls to showcase more pearls. Use groups of 30–36 spacers for a more spaced out

effect. End with 1 pearl, leaving enough wire to make another small, closing loop after the last pearl as you did to begin in Step 2. ●
